WHY CHOOSE KOFAMBROL

ONE OF A KIND

Unique pharmaceutical formula not found in any other product in UAE.

SAFE & CONVENIENT

With KOFAMBROL Dispersible Tablets patients are regarded as the safest, most convenient and most economical method of drug delivery having the highest patient compliance.

RAPID RESULTS

KOFAMBROL provides rapid effects through rapid disintegration and bioavailability.

PALATABLE

KOFAMBROL helps maintain the stability of the drug in a solid dosage form and make it palatable.

Guaranteed Quality

It is manufactured by the prestigious Ozon pharmaceutical company which is registered in MOH UAE.

Advantages of Kofambrol

02

Side effects known to be associated with Kofambrol treatment, such as gastrointestinal disturbances and cutaneous rash, occurred rarely and represented isolated cases.

01

Kofambrol prevents major biofilm-dependent airway infections, such as ventilator-associated pneumonia, cystic fibrosis and chronic obstructive pulmonary disease, which are currently difficult to treat due to antibiotic resistance.

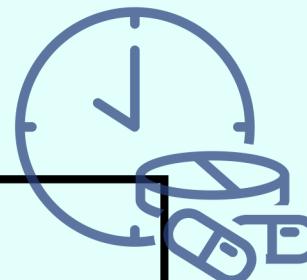

03

Prevention and treatment of upper RTIs (URTI) by exert secreto-lytic, antioxidant, and anaesthetic activities

04

Kofambrol, administered concomitantly with amoxicillin, or ampicillin and erythromycin, increases the antibiotic levels in the lung.

DOSAGE

In adults and children over 12 years

The usual dose is 60 mg (one tablet) three times a day. This may be adjusted based on the response and tolerance of the patient.

In children of 6 to 12 years

The recommended dose is 30 mg (half a tablet) two to three times a day.

***It is not recommended to take ambroxol without doctor's prescription for more than 4–5 days.**
